About Me

Born and raised in Cape Town, South Africa.
I've had a lifelong interest in technology and computers.
I've always felt a strong sense of satisfaction from building things
and this has lead me to coding.
I'm looking for real world experience and am excited about taking
my first steps towards becoming a professional developer.

Education

School of IT
Advanced Python Course • *December 2020*

CodeSpace
Intro to Web • *November 2019*

Tutoring
70+ hours of one-on-one tutoring with qualified programming tutors and industry professionals.

Skills

- **Python**
- **Linux**
- **HTML & CSS**
- **Git**

Work

Tech Magazine ZA
Freelance Writer • *June 2020 - Present*

References

Jason Norwood-Young - 10layer.com

I am a professional software developer with over 20 years experience in enterprise, web, and media software development. I have been teaching Luca Bazzea coding once a week, focusing on web development. We have been covering basic HTML, CSS and Javascript, as well as design and layout, design thinking, version control, and good coding practice.
I have also exposed Luca to some advanced topics, such as machine learning, open data and big data.

Luca is an excited, attentive student, and a young man of great character.
He will succeed with whatever he puts his mind to.

Sincerly, Jason Norwood-Young.

Other

- Blue belt in Brazilian Jiu-Jitsu

- Springbok colours in Rock Climbing
